# RiexTrack Double wall slides

---

Thin double metal wall slide assembly (13 mm). Equipped with a Soft Close shock absorber for gentle closing. A synchronization mechanism for movement without noise, resistance and lateral stability.

Drawer easy and quick to assemble thanks to the fixings integrated into the side walls for the front side supports. Only requires manufacturing the bottom, front and back.

Robust and stable slide with a total load capacity of 40 kg. This set has a proven durability of 100,000 cycles and is certified according to standard EN15338 + A1:2010.

The adjustments positioned in the side walls allow the following drawer adjustments: vertically (up/down) and horizontally (left/right). On this model, a screw at the rear of the wall allows adjustment of the tilt of the drawer.
